Abstract.

The purpose of this study was to determine the effect of the Indonesian Ministry of Youth and Sports Ship Youth Nusantara program on the sense of Youth Nationalism, the influence of the Indonesian Ministry of Youth and Sports Ship Youth Nusantara program on National Insight. The research method used is descriptive quantitative by using the average test and multiple regression test. The results showed that the influence of the Nusantara Youth Ship Program (X1) on Youth Nationalism (Y1) showed that the X1 variable had a significant effect on Youth Nationalism (Y1), the Nusantara Youth Ship Program (X1) on National Insight (Y2) showed its value was greater than (0.05), then the basic provisions of the partial test of the Pemuda Nusantara Ship (X1) do not have a significant effect on National Insight (Y2).

Keywords: Nusantara Youth Ship Program, Youth Nationalism, National Insight

I. INTRODUCTION

The Nusantara Youth Ship program focuses on cooperation, synergy, socialization, interaction, dialogue, discussions, exchanging experiences and discussing developing regional, national and international issues as well as learning about different cultures, studying the potential of natural resources, business opportunities during travel or during their stay in the place visited. This is certainly a priority program for the Ministry of Youth and Sports of the Republic of Indonesia in order to succeed in national programs, one of which is to make the sea as part of national investment as the largest maritime country in the world that can play an active role in national and international economic development.

One of the priority programs carried out by the Ministry of Youth and Sports in an effort to increase youth capacity is through awareness, empowerment and development of youth, namely by implementing the Nusantara Youth Ship program which is under the authority of Deputy I Youth Empowerment. Among other things that have been implemented by the Ministry of Youth and Sports are the Nusantara Youth Ship Sail Bunaken 2009, Sail Banda 2010, Sail Wakatobi 2011, Sail Morotai 2012, Sail Komodo 2013, Sail Raja Ampat 2014, Sail Tomini 2015, Sail Karimata 2016, Sail Sabang 2017, Sail Tambora 2018, Nias Sail 2019. [4]

The Ministry of Youth and Sports of the Republic of Indonesia through the Deputy for Youth Empowerment, stated that the Nusantara Youth Ship activities in Sail Karimata 2016 were carried out with the following objectives:

1. Increase youth to love the homeland.
2. Increase national insight and youth nationalism
3. Increase nautical love among youth
4. Develop an entrepreneurial spirit and maritime industry among youth by utilizing the sea and the coast which has the potential to be developed into a national and international recreational tourism or sports industry.
5. Fostering brotherhood and cooperation among youth. [1]

Participants who take part in the Nusantara Youth Ship program are the result of the selection process. In the participant selection process, in addition to administrative selection, there are other selection stages, namely: personality material, regional language skills, general knowledge, physically and mentally healthy, and the arts. The activity of the Indonesian youth ship in the 2016 Sail Karimata was based on the

Presidential Decree No. SKEP/1/Menko/Maritim/2016 concerning the national committee for organizing the Karimata Strait Sail in 2016. The theme of the activity was “through the Pemuda Nusantara Ship, we increase the capacity of youth in the maritime sector towards the maritime axis. world” with the motto “Different for Together”. [3]The Nusantara Youth Ship Program in Regional Development, increasing the growth and birth of youth entrepreneurial abilities, entrepreneurship is a process of creating creative and innovative ideas and movements in the creation of something new to get a new opportunity by spending time and effort followed by the use of money, physical, high risk. will be faced and then get a reward in the form of money and personal satisfaction. [2]

Increasing National Insight in Regional Development needs to be accompanied by the development of understanding to the public about Multiculturalism from the role of regional institutions and apparatus in order to be able to overcome friction and conflicts that occur in society, so that there is a community learning process towards increasing the capacity of human resources in the Unitary State. In the Republic of Indonesia, Multiculturalism is a picture used to see a person's view of the variety of life in the world, or a cultural process that focuses on accepting the reality of diversity, and various kinds of multicultural cultures that exist in people's lives regarding values, systems, cultures, habits. , and the politics they follow. [8]

II. RESEARCH METHOD

This research was conducted in all provinces of Indonesia, namely the alumni of Kapal Pemuda Nusantara Sail Karimata 2016 (KPN). With the object of research the influence of the 2016 Sail Karimata Nusantara Youth Ship Program on youth nationalism and National Insight. The time of this research was carried out for 4 (four) months from February 2020 to June 2020. The type of research used in this research is descriptive quantitative using the average test and multiple regression tests. [7] Consists of three variables, namely the independent variable (X) as the Nusantara Youth Ship Program, the dependent variable (Y1) as Youth Nationalism and the variable (Y2) as National Insight.

III. RESEARCH RESULTS

The Influence of the Nusantara Youth Ship Program on Youth Nationalism. The results of the variable regression analysis of the Nusantara Youth Ship Program turned out to have a significant effect on Youth Nationalism in this research area, namely the participants of the 2016 Sail Karimata Nusantara Youth Ship. 2016 which was carried out by the Ministry of Youth and Sports of the Republic of Indonesia became an option in increasing Youth Nationalism.Regardless of the results of the calculation of the influence of the Nusantara Youth Ship Program on Youth Nationalism, we all agree that youth are the successors of the wheels of Indonesian nation building because youth are the target of thinkers to be better than the past because youth are the future of the nation. Youth must use their position to build youth resources from the community so that they have knowledge and competition to compete in people's lives.

Increasing nationalism in Regional Development, Nationalism is an understanding, which argues, that the highest allegiance of the individual must be submitted to the national state. A very deep feeling of a close bond with the homeland, with local traditions and official rulers in the area has always existed throughout history with different strengths. [5] For the Indonesian people, nationalism can be both internal and external. Inward nationalism is needed to solve the nation's problems, carry out development, free poverty and underdevelopment, and create people's welfare in all corners of the archipelago.Problems in the era of globalization that occur in various aspects of life greatly affect the competitiveness of youth. So that youth, both directly and indirectly, are required to have skills, both practical skills and skills that use high technology to be able to compete in creating jobs/developing the type of work they are doing. To overcome these problems, there is one solution that can be implemented, namely through exploring the potential of the sea. The potential can be in the form of natural resources, long coastlines, and others.

The Influence of the Nusantara Youth Ship Program on National Insights.

The results of the variable regression analysis of the Pemuda Nusantara Ship Program did not have an influence on the National Insight in this research area, namely the participants of the Nusantara Youth Ship Sail Karimata 2016 carried out by the Ministry of Youth and Sports of the Republic of Indonesia is an

option in alternative improvements in terms of National Insight. The goal to be achieved from the National Insight carried out by the Indonesian Ministry of Youth and Sports is to shape the character of youth to become independent. However, based on the results of this study, this goal was not achieved as seen from the results of respondents about the 2016 Sail Karimata Nusantara Youth Ship Program that was carried out. This independence includes the independence of thinking, acting and controlling what they do. Furthermore, it is necessary to explore what is really meant as a young man who has National Insight. National Insight is a condition experienced by youth which is characterized by the ability to think, decide and do something that is deemed appropriate in order to achieve solving the problems faced by using the power and abilities consisting of cognitive, conative, psychomotor abilities, with the mobilization of resources owned by the environment. Increasing National Insight in Regional Development, youth need education, especially non-formal education. Development counseling is a form of non-formal education for youth to accelerate development. [6]

Implications of the Nusantara Youth Ship Program in Regional Development.

The Nusantara Youth Ship program in increasing youth capacity and youth empowerment has an influence in regional development. The implications for regional development refer to the indicators of the 2016 Sail Karimata Nusantara Youth Ship Program. In the following, each indicator of the Nusantara Youth Ship Program will be explained.

First, actualizing youth entrepreneurship in regional development, providing briefing to the participants of the Nusantara Youth Ship as well as providing entrepreneurship training and making visits to areas that are stopped on the 2016 Sail Karimata Nusantara Youth Ship route to see the culinary and cultural industries that can be developed in their respective regions. With this method, it is a provision for youth to gain insight and input and be able to realize entrepreneurship in their area. This is where through the Nusantara Youth Ship Program, youth are directed to explore their potential and their environment to become entrepreneurs so that they can grow and improve the economy in their area.

Second, youth empowerment. Strengthen youth as the successor to the ideals of the nation's struggle and human resources for development. Therefore, coaching and developing youth is a must. Not only a large number of youth, but also a very strategic position. [10] In this process youth are emphasized to acquire sufficient skills and knowledge to influence their lives and the lives of other people in their environment, in this empowerment youth are guided to develop themselves and new knowledge and skills to be realized in the region, and can become a driving force in the region. Origin to develop all the potential of natural resources and human resources in the environment.

Third, the love of the sea among youth is that the sea or the sea is a special natural wealth in Indonesia, in the love of the sea, youth are expected to play an active role in protecting the coastal environment and preserving the natural wealth in the environment, as well as maximizing the potential of marine tourism to improve the economy of coastal communities.

Fourth, strong brotherhood. Strong brotherhood is an important capital in social life, the existence of a strong brotherhood becomes a separate power in humans. Conditions like this are very good and must be used by young people to share experiences, insights so that it is hoped that in the future it will become an economic strength between regions with one another, with good communication, a business can emerge between youths and increase cooperation between youth throughout Indonesia for economic improvement. Better. The Nusantara Youth Ship Program in Regional Development, increases the growth and birth of youth entrepreneurial abilities.

IV. CONCLUSION

Based on the results of this study, it can be concluded several things as follows:

1. The Nusantara Youth Ship Program conducted by the Ministry of Youth and Sports of the Republic of Indonesia has a significant effect on Youth Nationalism.
2. The Nusantara Youth Ship Program conducted by the Ministry of Youth and Sports of the Republic of Indonesia has no effect on National Insight.
